

Wiggins Land Development Code

Update 2009

Final Draft for Public Review

How to review the updated code:

The updated land development code has been color coded to make it easier to denote changes from the 2000 Wiggins Land Development Code. The color code is as follows:

Black text references the original text that was not significantly altered in most cases.

Red text references text that was a part of the original code that is proposed to be deleted from the code update.

Blue text references a majority of the proposed additions to the land development code.

Please note that while most of the text has been color-coded, using the system mentioned above, we do not concede that all text changes are denoted. Therefore, it is up to the reader to verify all changes from the 2000 Wiggins Land Development Code to the proposed update.
